## Senator Reed Deals Compromise On New Tax Bill Is **Being Attempted**

Measure Passing House and Senate Goes To Conference Body

DIFFERENCES TO BE WORKED OUT

Expect Some Changes On Income Tax Provision Before Final Action

By WILLIAM K. HUTCHINSON International News Service Staff

WASHINGTON, April 14. The administration's new tax bill, rewritten by the senate to impose \$511,000-000 more income, corporation, estate and gift taxes next year, was sent to conference today to compromise

differences with the house.

A Progressive bloc, fighting for higher taxes on wealthy citizens and giant corporations, forced a number of concessions from administra-tion leaders. They joined the Democratic chieftains, too, to close scores of loopholes in administrtive sections of the present law, through which rich taxpayers have escaped taxes in recent years.

"Little Fellow" Measure As finally passed by the senate, the bill was a "little fellow's" measure. It shifted the burden of taxation from persons, with net in-comes of \$9,000 or less, to persons with larger incomes. The senate added \$82,000,000 to existing incomtaxes, but placed this additional burden entirely on the "big fellows."

(International News Service) WASHINGTON, Pa., April 14. -Killing his two children in what police say was a jealous rage because his wife left him, Gleason Roupe, 26, was dead here today after turning the gun on himself.

Gleason, Jr., four-year-old, son, and Betty, two, were the victims of the shooting attack. The girl died instantly. Gleason, Jr., died two hours after being received at the hearits!

Police said Roupe's wife Mabel, 25, left their home Thursday, presum-ably after a quarrel. The father of the children falled to go to work Thursday night as there was no one to care for the babies.

Authorities say they had been unable to reach Mrs. Roupe to inform

her of the tragedy. Makes Discovery.

Senator Reed was introduced by Attornay John P. Leithney who is

Attorney John P. Lockhert who is heading his committee here. At the conclusion of the Reed address Judge James A. Chambers spoke briefly urging that Senator Reed be re-elected. "In times like these we had man of vision and courses and need men of vision and courage and understanding" said Judge Chambers. "I sincerely trust that he will be re-elected."

When Senator David A. Reed comes back to New Castle he will have a key to the city at least. During the dinner held for him in the Castleton Hotel Friday night, Fred L. Rentz presented him with a key to the city in behalf of the mayor, who could not stay for all the program.

Rev. Walter E. McClure, pastor of the First Presbyterian church de-livered the invocation. The dinner itself was a compliment to the Castleton and to the manager Thomas Boyle. Both dinner and program combined to make an evening of profit and interest to the people who were present. From the reception given Senator Reed there was no doubt that the men and women present believe him to be an able. sincere statesman who should be re-turned to Washington.

(international News Service MT. HOLLY, N. J., April 14.
A tale of tireless and brillant sleuthing that would have done credit to A. Conan Doyle, creator of the fictional Sherlock Holmes, was climaxed in real life here today when Ellis Park-er, grisled chief of Burlington county detectives, declared that the sensational murder of Bradway Brown more than a year ago has been solved.

The arrest and indictment of three men ended a painstaking secret investigation that began on January 13, 1933, when Brown, young and wealthy printing company ex-ecutive, was found shot to death in front of the telephone of his home near Palmyra, N. J.

Hold Three Suspects The suspects are in separate jails—one in Mt. Holly, another in New York and a third in Eastern State

The checks were sent to Ptitsburgh from Philadelphia by airplane and a courier went from New Castle to Pittsburgh and brought them out. All employes in the administration office came back after dinner Friday night and worked on through to noon today. But the pay went out.

COMPROMISE ON NEW TAX BILL IS BEING COMLETED

(Continued From Page One) \$263,000,000 increased taxation ap-

proved by the house. All the sen-ate increases were aimed at "big fellows" or giant corporations. . Administration Loses

The administration suffered three major defeats during senate con-sideration of the bill. First, the senate approved the Couzens superadditional on all income taxes computed under the new rates. Next the senate defied President Roosevelt by imposing a three cents a pound tax on the processing of imnorted veretable oils and copra after the executive requisted an ex-planation for Philippine imports Third, it approved the Laffollette amendment, forcing complete pub-

licity of all income tax returns.

The Lafoliette publicity plan undoubtedly will be modified in con-ference. It would make income tax returns a matter of public rec-ord, subject to complete examina-

tion and inspection by any crit-leizen. The compromise may force publication by internal revenue col-lectors of the names of taxpayers, paying more than \$1,000 of incomes taxes, and the exact amount paid. JEWELRY STORE

It is believed that the fire may have started from a defective chimney. Firemen were called to the Watt home on February 5, when the home caught fire from this cause. Investigation by Fire Chief H. Clare Stockman this morning, revealed several cracks in the chimney, and it is possible the blaze originated in this manner.

Detective Says Assassination At Palmyra, N. J., Over Year Ago Is Solved

## THREE SUSPECTS

UNDER INDICTMENT

(International News Service) MT. HOLLY, N. J., April 14. A tale of tireless and brilliant sleuthing that would have done credit to A. Conan Doyle, creator of the fictional Sherlock Holmes, was climaxed in real life here today when Ellis Park-er, grisled chief of Burlington county detectives, declared that the sensational murder of Bradway Brown more than a year

ago has been solved. The arrest and indictment of three men ended a painstaking secret investigation that began on January 13, 1933, when Brown, young and wealthy printing company executive, was found shot to death in front of the telephone of his home near Palmyra, N. J.

Hold Three Suspects The suspects are in separate jails one in Mt. Holly, another in New York and a third in Eastern State Penitentiary, Philadelphia.

Edward Adamsky, 28, is the prisoner here. In Philadelphia Adam Szewczak is imprisoned in connection with a \$125,000 bond robbery charge, as well as the murder accusation, captured in the Bronx, Solomon Lutz, a barber, is confined in Tombs prison, New York.

The three suspects were secretly indicted here a few days ago. The White-Crest Parker charged that Adamsky and Szewczak actually committed the murder. In the indictment they are directly accused of the killing. Lutz is named in a third true bill as an accessory before and after the fact.

Working all through the night, the administrative office of the relief works division got out the pay checks for the men on projects in time to pay them all before noon today. The total pay roll amounted to \$18,448.86, considerably under other weeks but more than was anticipated for the week past.

The checks were sent to Ptitsburgh from Philadelphia by airplane and a courier went from New Castle to Pittsburgh and brought them out. All employes in the administration office came back after dinner Friday night and worked on through to noon today. But the pay went out.

A TLAS no longer supports the civilized world. Rather, the burden rests upon the supple shoulders of a

youth known as Electricity. He stands with feet firmly planted at the opposite poles while coursing through his body, from negative to positive, flows the greatest force known to mankind today.

Some call it white coal; some call it a natural phenomenon; others call it indefinable force.

No one catastrophe could befall the world today which would be more paralyzing or more devastating in its effect than the sudden loss of the natural phenomenon called electricity. Man can hardly conceive of modern civilization continuing with this banavolent force.

#### CONQUERING FOG

Fog, that ancient enemy of ocean navigation and a no less peril to modern air travel, seems to have been conquered in one sphere and to be well on the way to being eliminated in the other.

Captain Flavel M. Williams, master mariner, explorer and inventor of the fog camera, says the usefulness of the camera on sea has been fully tested and demonstrated and that its development in a revised form for use on aircraft is imminent.

His statement was made in connection with the presentation to him of a special gold medal of the American Museum of Safety in recognition of his invention of the camera.

#### FARM NO PLACE FOR FAILURES

A comparatively recent public utterance by Henry Ford, advised men who haven't the skill to work with machinery to go back to the farm-

But anyone joins the list of misinformed, misguided persons, who seem to feel that a farm can be run by most anyone. Such is decidedly not the case.

This strange belief never was true; and right at the present time, it is further removed from the truth than ever before.

Successful farming is calling more and more for special intelligence and special aptitude for such endeavors. And it is extremely difficult to see how a man incapable of acquiring and applying the relatively limited knowledge and skill needed on the assembly line in an automobile factory will ever learn to do successfully the myriad tasks required of a successful farmer.

It is granted, of course, that a man who fails in one line of human endeavor may come back to make a great success doing something else. He didn't like a Catholic; he didn't But this idea that failures in other lines should be dumped into agri culture-where all will be successful-is 100 per cent, wrong. Those who think it can be done should give it a whirl themselves on the farm, and discover for themselves that plenty of other equipment besides a strong

#### MENACE OF COLDS

mind and a weak back are required to make a good farmer.

Spring's other annoyances and discomforts could be put up with gracefully were it not for those common ailments of grip and colds which are most prevalent in spring. No matter how often a person has been afflicted with these maladies a new attack lays him low in body and spirit. Absences from work on account of these common ailments are a se

vere blow to industry and business. Claims against benefit associations because of influenza or grip make up 20 per cent of the total compensation paid by these associations. If people could only avoid getting these diseases they would save

themselves discomfort, doctors' bills, loss of wages and danger of serious illness. But try as one may, it seems impossible to escape at least one attack a season.

People who get plenty of fresh air, who ventilate their homes thoroughly, who avoid drafts and wet feet, and who are careful to take a good amount of exercise are the ones least afflicted. Fresh air is a wonderful medicine.

#### GOOD OLD LA FOLLETTE ECONOMY

Back comes Senator La Foliette with his scheme of magnificent pro- I have never known a merchant who portions for scattering Uncle Sam's billions. Heretofore he has advocated a Five Billion distribution for public buildings, highways, civil works and so on. This time he doubles the amount to Ten Billions.

That sort of thing may be popular out in Wisconsin-which doesn't furnish much income to the Government anyhow-but just how does the individual who is the victim of income-tax exactions feel about it? One would imagine that he will not be impressed favorably. For if the United States borrows Ten Billions the debt must be settled and who will be called upon to make good if not the taxpayer?

The La Follette scheme involves a tremendously unbalanced budget, a heavy increase in taxation or inflation of the rankest kind. The Senator is indulging in an iridescent dream-or playing a little political game in his own State, where he is a candidate for renomination.

There's consolation. If the business of mavies is to protect foreign trade, we won't need more than one good rowboat,

#### THE MODERN ATLAS

A TLAS no longer supports the civilized world.

Rather, the burden rests upon the supple shoulders of a flexible-muscled young giant; a tawny-haired, swiftly-moving grandparents in less than a year; youth known as Electricity.

He stands with feet firmly planted at the opposite poles while coursing through his body, from negative to positive, the pink and white locusts and how flows the greatest force known to mankind today.

Some call it white coal; some call it a natural phenomenon;

others call it indefinable force.

Call it what one will, it is the thing today which hurls voices and music around the world; which turns the motors of the industries which have made American a great nation; pulls long the system of the rough all the neighbordustries which have made American a great nation; pulls long hood in the springtime the cottontrains of cars laden with human freight and valuable merchan-wood trees would send their wisps of stuff on every passing breeze. dise; lights the greatest city and the smallest hamlet.

the inside of the human body and other matter. It is the power which courses through the veins of the world today, every bit as necessary as the red blood which flows through the circulatory system of the human body.

No one catastrophe could befall the world today which would be more paralyzing or more devastating in its effect than the sudden loss of the natural phenomenon called electricity. Man can hardly conceive of modern civilization continuing without this benevolent force.

Out of my memories of the mulberry try, I weave another fabric of child-hood pleasure—and of how sweet it was on a warm summer's day to lotter beneath the mulberry tree and touch the sweet fruit and let it fall, almost, into our waiting mouths.

And eat and eat and eat of the fruit until our small, extensible stomachs were full as full could be and we'd dreams of the future and be utterly content.

And to those friendly mulberries I am forever grateful.

#### CONQUERING FOG

Fog, that ancient enemy of ocean navigation and a no less peril to modern air travel, seems to have been conquered in one sphere and to be well on the way to being eliminated in the other.

Captain Flavel M. Williams, master mariner, explorer and inventor of the fog camera, says the usefulness of the camera on sea has been fully tested and demonstrated and that its development in a revised form for use on aircraft is imminent.

His statement was made in connection with the presentation to him of a special gold medal of the American Museum of Safety in recognition of his invention of the camera.

According to Commodore Randall, captain of the steamship Man-According to Commodore Randau, captain of the Samera, which makes er, you did not say something which hattan and former master of the Leviathan, the camera, which makes er, you did not say something which might have smoothed out the point He based his observation on the results of the use, since early this year, of the fog camera on the Manhattan. As an illustration of its value, he cited an incident off the coast of Plymouth, England. When a thick haze reduced visibility to a mile and a half, he said a photograph taken by the camera at a distance of three miles showed clearly the salient features of the shore.

If the camera can be made as useful aboard airships as on steamers, it will mean the introduction of a new and valuable safety device in

#### FARM NO PLACE FOR FAILURES

A comparatively recent public utterance by Henry Ford, advised men who haven't the skill to work with machinery to go back to the farm-

But anyone joins the list of misinformed, misguided persons, who seem to feel that a farm can be run by most anyone. Such is decidedly

This strange belief never was true; and right at the present time, it is further removed from the truth than ever before.

Successful farming is calling more and more for special intelligence and special aptitude for such endeavors. And it is extremely difficult to see how a man incapable of acquiring and applying the relatively limited knowledge and skill needed on the assembly line in an automobile

factory will ever learn to do successfully the myriad tasks required of a successful farmer. It is granted, of course, that a man who fails in one line of human endeavor may come back to make a great success doing something else. But this idea that failures in other lines should be dumped into agri-

culture-where all will be successful-is 100 per cent. wrong. Those who think it can be done should give it a whirl themselves on the farm, and discover for themselves that plenty of other equipment besides a strong mind and a weak back are required to make a good farmer.

#### MENACE OF COLDS

Spring's other annoyances and discomforts could be put up with gracefully were it not for those common ailments of grip and colds which are most prevalent in spring. No matter how often a person has been afflicted with these maladies a new attack lays him low in body and

Absences from work on account of these common ailments are a severe blow to industry and business. Claims against benefit associations because of influenza or grip make up 20 per cent of the total compensation paid by these associations.

If people could only avoid getting these diseases they would save themselves discomfort, doctors' bills, loss of wages and danger of serious illness. But try as one may, it seems impossible to escape at least one attack a season.

People who get plenty of fresh air, who ventilate their homes thoroughly, who avoid drafts and wet feet, and who are careful to take a good amount of exercise are the ones least afflicted. Fresh air is a wonderful medicine.

#### CONQUERING FOG

Fog, that ancient enemy of ocean navigation and a no less peril to modern air travel, seems to have been conquered in one sphere and to be well on the way to being eliminated in the other.

Captain Flavel M. Williams, master mariner, explorer and inventor of the fog camera, says the usefulness of the camera on sea has been fully tested and demonstrated and that its development in a revised form for use on aircraft is imminent.

His statement was made in connection with the presentation to him of a special gold medal of the American Museum of Safety in recognition of his invention of the camera.

According to Commodore Randall, captain of the steamship Manhattan and former master of the Leviathan, the camera, which makes use of infra-red rays, is "one of the greatest aids ever given navigation." He based his observation on the results of the use, since early this year, of the fog camera on the Manhattan. As an illustration of its value, he cited an incident off the coast of Plymouth, England. When a thick puting players. haze reduced visibility to a mile and a half, he said a photograph taken by the camera at a distance of three miles showed clearly the salient have enjoyed seeing these two men tended for the turkey. features of the shore.

If the camera can be made as useful aboard airships as on steamers, it will mean the introduction of a new and valuable safety device in aviation.

## FARM NO PLACE FOR FAILURES

A comparatively recent public utterance by Henry Ford, advised men who haven't the skill to work with machinery to go back to the farmor words to that effect.

But anyone joins the list of misinformed, misguided persons, who urement. seem to feel that a farm can be run by most anyone. Such is decidedly not the case.

This strange belief never was true; and right at the present time, it is further removed from the truth than ever before.

Successful farming is calling more and more for special intelligence and special aptitude for such endeavors. And it is extremely difficult to see how a man incapable of acquiring and applying the relatively limited knowledge and skill needed on the assembly line in an automobile factory will ever learn to do successfully the myriad tasks required of a

successful farmer.

It is granted, of course, that a man who fails in one line of human endeavor may come back to make a great success doing something else. He didn't like a Catholic; he didn't But this idea that failures in other lines should be dumped into agriculture-where all will be successful-is 100 per cent. wrong. Those who think it can be done should give it a whirl themselves on the farm, and In discover for themselves that plenty of other equipment besides a strong mind and a weak back are required to make a good farmer.

## MENACE OF COLDS

Spring's other annoyances and discomforts could be put up with gracefully were it not for those common ailments of grip and colds which are most prevalent in spring. No matter how often a person has been afflicted with these maladies a new attack lays him low in body and spirit.

Despite Opposition Of Administration Group Fights For Bank Depositors Relief

McLEOD BILL IS BEING ARGUED

(International News Service)
WASHINGTON, April 14.—The
house drive for relief to depositors
of closed banks was pressed today espite administration opposition. With 145 house members backing the bill of Rep. New Fight Started

Although house leaders held the petition to discharge the banking committee from consideration of the McLeod bill had been nullified, the McLeod bill backers were fighting along other lines. A petition to the House Rules committee to place the McLeod bill

on preferred status was taken under consideration by that committee. While chairman Bankhead (D) of Alabama, planned to seek administration advice on the measure, the McLeod bill supporters were ready to file a petition to discharge this committee after a waiting period of

seven days, by parliamentary maneuvers. But backers of the McLeod bill believed the sentiment in the house was so strong that some action will be

Most Of Them Rely On County Commissioners At Drawing Today

Few applicants for places on the Republican or Democratic county tickets were present at the county commissioners' office this morning when drawing took place for posi-tions on the hallot at the spring primary. Candidates were apparently willing to leave it to the county commissioners to see that the drawings were conducted fairly. The drawing was conducted on the

lottery pian as specified by law. The commissioners had a little box in which were placed 16 little black balls, resembling marbles, except that one side of each was flat and a number was printed on it. The balls were shaken up in the box. One of the commissioners then inserted his hand into the box and

drew out a number. Where there

were more than one candidate in a precinct the lowest number drawn was given first place, the next lowest second and so on. Formerly it was the custom to list the names alphabetically, but this did not appear to be a fair way. The drawings are more satisfactory to all concerned, and they were conducted today in a fair and impartial man-

By KINGSBURY SMITH International News Service Staff
Correspondent Copyright, 1934, by International

News Service) WASHINGTON, April 14.—Haiti wants the United States to maintain American marines in the so-called "Black Baghdad." of the Caribbean indefinitely.
This was learned from an unim-

peachable source today as the State Department completed arrangements for the visit here next week of President Stenio Vincent, chief executive of the little West Indian island republic.

Retain Marines Although President Vincent is Haiti, reports are current in Peri Au Prince that he may raise the question of maintaining the marines there beyond November 1st of this year, the date when the "leathernecks" are due to be completely evacuated under the recent. evacuated under the recently con-cluded treaty with the island. President Stenio Vincent, Of told some time ago by a prominent American not to seek independence unless they wanted it, because if they asked for it, they would get it. Political Issue

Secondly, withdrawal of the marines has long been a political issue and it is believed the opposition factions in Haiti, although most of them are known privately to favor the presence of the leathernecks, would immediately utilize any such suggestion by President Vincent as political ammunition against his party. Despite the private sentiment for maintenance of the marines, the factions still fear the issue politically.

Have National Guard Nevertheless, the ironical situation is said to exist that after nearly 15 years of political wailing for withdrawal of the marines, the Haitian people now actually are

loath to see them go.

Despite the organization of a national guard, the natives, most of whom are illiterate, fear a return to the old order of things, when banditry was rampant. The pres-ence of the marines has brought coming here ostensibly to urge President Roosevelt to withdraw American financial control over the money which the marines has brought them a great sense of security. The natives also are reluctant to lose natives also are reluctant to lose the money which the marines spend.

Most Of Them Rely On County Commissioners At Drawing Today

Few applicants for places on the Republican or Democratic county tickets were present at the county commissioners' office this morning when drawing took place for posi-tions on the ballot at the spring primary. Candidates were apparently willing to leave it to the county commissioners to see that the drawings were conducted fairly.

The drawing was conducted on the lottery plan as specified by law. The commissioners had a little box in which were placed 16 little black balls, resembling marbles, except that one side of each was flat and a number was printed on it.

The balls were shaken up in the box. One of the commissioners then inserted his hand into the box and drew out a number. were more than one candidate in a precinct the lowest number drawn was given first place, the next lowest second and so on.

Formerly it was the custom to list he names alphabetically, but this did not appear to be a fair way. The drawings are more satisfactory to all concerned, and they were conducted today in a fair and impartial man-

Washington Playing At Pittsburgh; New York Giants Are In Cleveland

FANS ANXIOUS TO SEE STARS AGAIN

By DAVID J. WALSH
International News Service Sports
Editor
NEW YORK, April 14—Less than
three days out from the 1934 openings, this will be dress rehearsal day
in the maior leagues with all of the in the major leagues, with all of the sixteen clubs going into action for the first time in front of rabid, home town crowds. It is one of the biggest exhibition days of many years a sort of climax for a training season that has devoted itself with conspicuous gusto to the capture of the casual or exhibition dollar. It also is a little window dressing for the official ceremonies Monday in Washington and of Tuesday elsewhere, everything being it readiness even the weather. I mean it couldn't

be worse.

Boston, a great baseball town, is getting its first look at the Braves and Red Sox on the sa e field this afternoon. The intra-mural idea is also being carried out in New York, where the Yankees will play the Dodgers: in Chicago, with the curb meeting the White Sox, and in Philadelphia and St. Louis with the Phillies-Athletic: and the Cardinal-

Pirates—Senators

The Pirates and Senators, 1925 opponents in the world series, will re-fill the prescription in Pittsburgh meantime, while the distressed meantime, while the distressed Giants will try once more to win a ball game from the Indians, this time in Cleveland. After the man-ner in which they have trifled with the champions of the world or this trip, the Indians ought to look pretty good to the town that hasn't known a winner since 1920.

so should the Reds if only by contrast, in their Cincinnati premiere with the Detroit Tigers, at least until such time as the honest burgers along the American Rhine begin to arrive at a few honest conclusions. The Reds haven't got enough hitting or enough pitching. Outside of that, everything is just splendid.

The Indians seem to have looked preser

Cubs Are Good The Cubs to be coming up as the best looking national league team of the moment, followed by the Car-

The Athletics, strangley, have looked good at times this spring even after selling Grove, Cochrane. Walberg, Bishop and Earnshaw Marcum turned in one impressive effort in recent weeks, and of course any time that club gets even fair pitching, it's going to look very much the part. It has bout every-thing else, although Philadelphia critics inform me that it can't miss the second division and that the Phillies are a better club.

New Castle Mushball League Has Ten Strong Teams Ready To Start Season

Mushball in New Castle is taking a hold just now. There are ten teams ready to open the season about the first of May and continue through until September.

President Walther has called another meeting of the mushball league managers and officials for next Wednesday night at the "Y" at which time further plans for the coming season will be discussed.

The ten teams so far in the league are—West Side Merchants, Cunningham A. C., Scarazzos, Radlators, St. Andrews, Spencers, East Side Merchants, Ellwood Millers, Oak A. C., and Croton.

SPENCERS TO ORGANIZE A meeting of the Spencer mush-ball team will be held at the home of the manager C. Edward Spencer at 920 Winslow avenue, at 8 o'clock Monday night, at which time the team will effect an organization and get the players lined up. Anyone wishing a tryout with the Spencers is asked to attend. The Spencers plan for a strong team this coming summer, with Ingram and Louis McCleary assisting Spencer with the various details. Any teams desiring practice games can arrange them by calling Louis McCleary at

1, 1934, There Were 4,-700,000 Getting

Relief

WASHINGTON, April 14—An all time peak in the number of unemployed on relief rolls was reached on April 1, despite employment gains of the last year, relief administrator Harry L. Hopkins said to-

day.
Families on relief April I, numbered 4,700,000, compared with 4,-600,000 at the peak of last year Hopkins stated. He attributed the un-precedented number to the exhaustion of family reserves, throwing on relief additional families who have never before applied for aid.

Trend Is Upward

Hopkins emphasized that this increase in the face of indisputable gains in employment. He issued preliminary reports for 140 cities showing that the trend of relief from February, 1934, to March 1934, was upward 13 percent and that expenditures for relief from all public funds increased 20 percent in this

relief rolls in March, he said, was the continuous reduction in the reduction in the number of employes on civil works projects, many of whom transferred to relief rolls af-

#### **Deed And Mortgage Are Declared Void**

Verdict Secured By Samuel And Elmo Clark Against Mrs. Babiarz Is Lien

In the equity suit of Samuel Clark by his father, Elma Clark, against Mrs. Magdaline Babiarz, which grew out of a charge by Clark that Mrs. Babiarz had transferred certain property in order to escape payment of a judgment, Judge James A. Chambers has handed down a decree. It is held that a deed from Magdaline Babiarz to her son Joseph Babiarz, and a mortgage given by the son to the mother, are fraud-ulent and void and the same is set aside so far as plaintiff's judgment against the defendant is concerned. It is also held that a judgement in favor of M. J. Babiarz and against

Magdaline Bablarz, is fraudulent and void and the judgment of Clark is declared to be a lien against the property of Mrs. Babiarz.
The case back of the present or-

ders was somewhat unusual. Samuel

Clark, son of Mr. and Mrs. Elmo Clark, was returning home from school at the Lincoln and Garfield school, and was passing through an alley back of the Babiarz property when a heavy wind blew down a tree. The boy was caught by the falling tree and seriously injured. It was contended by the plaintiff that the tree was dead and unsafe. Director Hopkins Says April This was denied by the defendant, it being alleged that the accident was due to an unusual wind storm. The jury trying the case awarded Samuel Clark a verdict of \$5000, and Elmo Clark, the father \$750. It was then found that there had been a transfer of property and certain iens, which it was claimed were he result of an attempt of Babiarz to escape payment of the verdict. It was these transactions that the court has decreed to be

# Cartwright Enters

For Nomination In Secand County District

PAUL J. CARTWRIGHT

In announcing my candidacy for Representative in the general Assembly for the second district of Lawrence county, I wish to state that I have been a lifelong resident of Lawrence county, residing in Ellwood City. I attended the pubschool and graduated from the Ellwood high school. I graduated from college and entered medical school. When the United States entered the world war I left medical school and enlisted in the army. I was in the service for 15 months, nine months of which was spent in France. I was mustered out of service May 15, 1919, and immediately entered into business, and at present am secretary and treasurer of the Cartwright Hardware Co., one of the largest retail hardware com-

## **Unemployed On** Relief Set New All Time Mark

Director Hopkins Says April 1, 1934, There Were 4,-700,000 Getting

Relief

(International News Service) WASHINGTON, April 14-An all time peak in the number of unem-Babiarz to escape payment of the ployed on relief rolls was reached verdict. It was these transactions on April 1, despite employment that the court has decreed to be gains of the last year, relief admin- fraudulent.

Families on relief April 1, numbered 4,700,000, compared with 4. 600,000 at the peak of last year Hopkins stated. He attributed the unprecedented number to the exhaustion of family reserves, throwing on relief additional families who have never before applied for aid.

Trend Is Upward Hopkins emphasized that this increase in the face of indisputable gains in employment. He issued preliminary reports for 140 cities showing that the trend of relief from February, 1934, to March 1934, was upward 13 percent and that expenditures for relief from all public funds increased 20 percent in this

The principal cause of the rise in relief rolls in March, he said, was the continuous reduction in the reduction in the number of employes on civil works projects, many of whom transferred to relief rolls af-

from a peak of more than four million in mid-January to slightly under two million on March 31, when

### **Deed And Mortgage** Are Declared Void

Verdict Secured By Samuel And Elmo Clark Against Mrs. Babiarz Is Lien

In the equity suit of Samuel Clark by his father, Elma Clark, against Mrs. Magdaline Babiarz, which grew of a charge by Clark that Mrs. Babiarz had transferred certain property in order to escape payment of a judgment, Judge James A. Chambers has handed down a decree. It is held that a deed from Magdaline Babiarz to her son Jos-eph Babiarz, and a mortgage given by the son to the mother, are fraud-ulent and void and the same is set aside so far as plaintiff's judgment against the defendant is concerned. It is also held that a judgement in favor of M. J. Babiarz and against ness for the unexpected guest.

and void and the judgment of Clark is declared to be a lien against the property of Mrs. Babiarz.

The case back of the present or-ders was somewhat unusual. Samuel

Clark, son of Mr. and Mrs. Elmo Clark, was returning home from school at the Lincoln and Garfield school, and was passing through an alley back of the Babiarz property when a heavy wind blew down a tree. The box was caught by the tree. The boy was caught by the falling tree and seriously injured. It was contended by the plaintiff that the tree was dead and unsafe. This was denied by the defendant it being alleged that the accident was due to an unusual wind storm. The jury trying the case awarded Samuel Clark a verdict of \$5000, and Elmo Clark, the father \$750. It was then found that there had been a transfer of property and certain liens, which it was claimed were the result of an attempt of Mrs.

Ellwood City Man Candidate For Nomination In Secand County Dis-

trict

PAUL J. CARTWRIGHT

In announcing my candidacy for Representative in the general As-sembly for the second district of Lawrence county, I wish to state that I have been a lifelong resident of Lawrence county, residing in Ellwood City. I attended the public school and graduated from the Ellwood high school. I graduated from college and entered medi-cal school. When the United States entered the world war I left medical school and enlisted in the army. I was in the service for 15 months, nine months of which was spent in France. I was mustered out of service May 15, 1919, and immediately entered into business, and at present am secretary and treasurer of the Cartwright Hardware Co., one of the largest retail hardware com-

panies in western Pennsylvania. I have been an active member of the American Legion, a director in the First National bank of Koppel, a director of the Chamber of Commerce, president of the merchants division of the Chamber of Commerce. While not a member of the bar, I studied law for three years. I am a Republican and have always voted the Republican ticket. I am not bound to any social, religious or political group or groups. I believe in the enforcement of all laws.

Again I wish to thank all those who supported my campaign four years ago. Confident of their continued support and that of many new friends I have made since then, I gladly submit my candidacy once I respectfully solicit your vote and

influence in the primaries to be held May 15, 1934. PAUL J. CARTWRIGHT.

Officers Are Elected For Coming Year And Reports Heard Of Church Progress

Rev. D. C. Schnebly, moderator of Westfield Presbyterian church at Mt. Jackson, conducted the annual congregational meeting in the church Friday evening with a large number of the membership in attendance

Reports for the year were most creditable, inasmuch as the congretion has been without a pastor for more than a year. A goodly sum was paid for benevolences and all bills to date were taken care of. Earl Cox acted as clerk for the meeting and an election was held at which time Guy M. Fullerton was elected as an auditor for three years. Harold Wallace, George Clarke, and Henry Ehle were named trustees for one year and W. J. Duff and C A. Stewart were named elders for three years.
